

**ABSTRACT OF THE DISCLOSURE**

The invention relates to a dressing aid which is intended for the infirm or persons with reduced motor skills. The inventive aid is of the type which facilitates said persons in pulling an item of clothing (5) onto the lower limbs of the body. The aid, which consists of at least one flexible strap (1) having a clamp piece (2) disposed at one of the ends thereof, comprises means of gripping the clothing to be worn and means of positioning said clothing (5) on the desired parts of the body. Said aid consists of two flexible straps (1), each of said straps comprising a clamp piece (2) at one of the ends thereof and a grip means (8) at the other end of same. Moreover, said straps are connected transversely at the central part thereof by means of a centre strap (3).
